

488 CHAMAELEON ACRYLIC FILLING PRIMER OPTIMAL HS 5+1

488 CHAMÄLEON ACRYLGRUNDIERUNG OPTIMAL HS 5+1

- Easy application
- It is not prone to surface tension (shrinkage) after drying
- Extended shelf life
- Can be applied on different surfaces, metal, hard plastic and old coatings
- Excellent filling characteristics

- Maximal coating thickness is up to **100-120 microns** when applying in two layers
- Optimal quality of application can be achieved with adding **25-30%** of thinner. No orange skin effect and coating imperfection such as blistering will occur
- When **60-70%** of thinner is added, application has to be carried out according to wet on-wet method in one layer
- IR-drying can be used not earlier than **15 min** after the application of the second layer
