

555 CHAMAELEON SOFT LIGHT PUTTY

INNOVATIVE FORMULATION

- Very smooth finish due to micro filling particles
- Excellent adhesive properties
- Can be sanded after only 20 min
- Time efficient, fast to apply, short drying time
- High elasticity
- Very smooth application
- Doesn't clog up sanding paper

- The new combination of high-tech micro fine filling particles and a mixture of base and light filling particles gives this putty unique qualities.
- Because of new fillers this putty is extremely smooth for fast application.
- Unlike ordinary medium-grained putty it requires minimal treatment with abrasive materials and minimal time for sanding.
- Fast drying, high elasticity, excellent adhesive properties on various materials.
