

**TECHNICAL DATA SHEET***Revision date: 10.10.2024***SPOT BLENDER**

<b>Article number:</b>	<b>13405, 13408</b>
<b>Colour:</b>	transparent
<b>Intended use:</b>	Car refinishing product/ Thinner, dilutant
<b>General characteristics:</b>	<p>Spot blender (fade-out thinner) is a special mixture of solvents used to "blend" the edges of spot repairs into the old clear coat.</p> <p>Usage:</p> <ul style="list-style-type: none"><li>▪ for smoothing the transition between old and new paint coating in the transition area</li><li>▪ as a fade-out thinner in combination with following products: 2K clear coats or 2K PU/acryl topcoats</li></ul>

**APPLICATION PROCESS**

Before use, carefully read and observe the warning texts on the label!

**Processing conditions:**

Please only use in an adequate ventilated environment with an ample supply of fresh air. Processing temperature should be at least +12°C and max. air humidity should not exceed 80%.

**Processing tips:**

- In case of use to dissolve old paint layers to improve the adhesion of the subsequent coating: Spot blender must be applied uniformly on the old paintwork and recoated within a few minutes.
- In case of use as a fade-out thinner: after application of the main product, immediately spray Spot blender over the border areas (overspray areas). Cover the overspray edges with a uniform coat of Spot blender until the rough overspray becomes visibly smooth. Do not apply too much, otherwise irregular dissolving or runs are to be expected.

**ATTENTION**

- Test suitability to avoid unwanted wrinkling/raising of old paintwork
- Do not apply on thermoplastic substrates
