

## TECHNICAL DATA SHEET

Revision date: 06.02.2025

## AEROSOL PRIMER PRO

Article number:	26142
Colour:	grey
Intended use:	Car refinishing product/ Primer
General characteristics:	<p>A fast drying all purpose 1K primer with excellent adhesion, corrosion protection and filling properties for all metal surfaces and conventional plastics used in the automotive industry. Can be used as a primer or filler depending on the film thickness.</p> <ul style="list-style-type: none"><li>▪ very good flow</li><li>▪ weldable</li><li>▪ recoatable with all standard water-based basecoats and 1K and 2K topcoat systems</li></ul> <p><b>Substrates:</b></p> <ul style="list-style-type: none"><li>▪ factory prime coats</li><li>▪ aluminium</li><li>▪ iron</li><li>▪ old paint coating</li><li>▪ steel</li><li>▪ plastics</li><li>▪ polyester putty</li></ul>

## TECHNICAL CHARACTERISTICS

**Base:** resin combination**Smell:** solvent**Consumption:** 1.0 - 1.5 m<sup>2</sup> (500 ml)**DFT:** primer (1 layer) 15 µm; filler (2 - 3 layers) 30 - 60 µm**Temperature resistant:** up to 150°C

## APPLICATION PROCESS

Before use, carefully read and observe the warning texts on the label!

**Processing conditions:**

Please only use in an adequate ventilated environment with an ample supply of fresh air. Processing

- temperature should be from +12 °C to +25 °C and max. air humidity should not exceed 80%.

### Processing tips:

- The substrate must be clean, dry, free from rust and grease. Remove old coatings or primers that have not cured or are not sound
- Beforehand, mask the parts that shouldn't be painted
- Degrease the surface
- Wear a respirator (type A2/P3 is recommended)
- The aerosol should have room temperature
- Before use, shake the aerosol for 2 min and spray a sample
- Distance to the surface should be approximately 20 - 30 cm
- Apply in 1 - 3 coats, dry film thickness 15 - 60 µm
- Keep a flash off time 2 - 3 min between each spray pass (depending on the layer thickness)
- Clean the valve after use (turn aerosol upside down and press the nozzle for approximately 5 sec)

Drying	Dust free	Set to touch	Re-coatable
Object temperature 20 °C	5 min	10 min	40 min
IR-Drying mediumwave*			10 min

\*The temperature of the object should not be more than 60 - 70 °C

The drying time depends on the ambient temperature, the humidity of the air and the thickness of the lacquer applied.

### Sanding:

Dry sanding with P400-500

Wet sanding with P800-1000

### VOC regulation:

EU limit value: Category B/e 840 g/l

This product contains max. 654.6 g/l VOC

### Shelf life:

120 months, if stored in tightly closed original container

This release replaces all eventually earlier issued versions.
