**Personal protective equipment:**

All personal protective equipment, including respiratory protective equipment, used to control exposure to hazardous substances must be selected to meet the requirements of the COSHH Regulations.

**General protective and hygienic measures:**

- Immediately remove all soiled and contaminated clothing  
Wash hands before breaks and at the end of work.

**Respiratory protection:**  
Filter A/P2 (EN 141, EN 143)  
In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

**Protection of hands:**  
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.  
Protective gloves (EN 374)  
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

**Material of gloves:**  
Butyl rubber, BR  
Recommended thickness of the material:  $\geq 0.7$  mm  
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
